MONTHLY BULLETIN OF EMPLOYMENT STATISTICS  
(Wage & Salary Earners in Civil Employment)

JANUARY 1944.

8 MAY 1944

PART I.

TOTAL PERSONS EMPLOYED IN ALL INDUSTRIES.

Estimates of total wage and salary earners working in industries (including rural and private domestic employment) are shown at yearly intervals in the table below. As there are no currently available data as to monthly employment in rural industry and private domestic service, Part II of the Bulletin, showing monthly variations in civil employment, covers, as heretofore, employment exclusive of rural and private domestic. The figures in all cases relate to wage and salary earners in civil employment only and exclude persons engaged full time in the Army, Navy and Air Force (including Permanent Forces).

The total number of wage and salary earners in employment in all industries is estimated to have increased from 2,060,800 in July 1939 to 2,109,300 in June 1943. The number of males so employed decreased from 1,495,100 to 1,399,100, while the number of females increased from 565,700 to 710,200. Estimates are as follows:-

AUSTRALIA : WAGE AND SALARY EARNERS IN CIVIL EMPLOYMENT (Thousands)

Month	Males			Females				TOTAL PERSONS
	Rural Industry (a)	Other Industry	Total	Rural Industry (a)	Private Domestic	Other Industry	Total	
July 1939	202.0	1293.1	1495.1	4.0	124.6	437.1	565.7	2060.8
July 1941	188.0	1363.4	1551.4	6.0	100.0	548.5	654.5	2205.9
June 1942	145.5	1309.5	1455.0	16.0	75.0	594.8	685.8	2140.8
June 1943	125.2	1273.9	1399.1	28.0	50.9	631.3	710.2	2109.3

(a) Excluding unpaid helpers

From 1939 to 1941 an increase of males in civil employment, concurrent with a substantial intake into the armed forces was made possible by the absorption of most of the unemployed, a substantial decrease in the number of employers and workers on their own account and a large inflow of men who would not in normal times have been gainfully occupied. During the later period (1941-43) a rapid increase in the number of men in the armed forces was made possible by reductions in civil employment.

The number of females in civil employment increased during the four years shown in the table. Between July 1941 and June 1943 the net enlistments of women in the defence forces were approximately 45,000. These are not included in the foregoing figures. The sources of the increase in number of women in employment and defence forces were absorption of unemployed, the movement into wage earning of women who had previously been employers or self-employed and the inflow of about 100,000 women who would not in normal times have been gainfully occupied. The first factor (decreasing unemployment) appears to have operated most in the early war period, the second factor has had most of its significance in the later period, while the movement into work of normally unoccupied women has been going on fairly uniformly throughout the war period.

P A R T II.

A. PERSONS EMPLOYED IN INDUSTRIES OTHER THAN RURAL AND PRIVATE DOMESTIC.

Monthly estimates of the number of wage and salary earners in civil employment (excluding rural workers and female domestics in private homes) are made through the use of Pay Roll Tax Statistics and direct returns of Commonwealth Government employment.

The trend of employment since the outbreak of war is shown in the table on the following page.

In July 1939 or just prior to war in Europe, there were 1,730,200 persons in employment (excluding members of the defence forces, rural employees and household domestics), but on the eve of the Pacific War (November 1941) total civil employment had reached a peak of 1,952,300, representing an increase of 222,100 persons in wage and salary earning employment. During the next ten months, however, total employment (excluding rural and private domestic) declined by 51,000.

Prior to November 1941 non-rural male employment was increasing, so that when Japan entered the war there were 1,381,300 male wage and salary earners in employment (including rural) or 88,200 more than the numbers in work at July 1939. War in the Pacific, however, meant calling large numbers of men into the forces, and in December 1941 male employment commenced to decline heavily. In the three months ended February 1942 there was a decline of 35,600 and in the seventeen months ended July 1943 there was a further decline of 76,000. Since July 1943 there has been a small increase in males in non-rural employment.

A large increase in the number of females in employment (other than rural or household domestic) has partly made up for the loss of men. When war broke out in the Pacific, there were 571,000 females in employment (excluding rural and private domestic) or 134,000 more than the numbers in work in July 1939. An additional 65,400 women were brought into work during the period from November 1941 to January 1944. Over the twelve months ended January 1944 female employment increased by 21,500, averaging 1,800 per month. The number of females employed in industry (excluding rural and domestic) was 45.6 per cent greater at the end of January 1944 than at the outbreak of war in Europe.

AUSTRALIA : WAGE AND SALARY EARNERS IN CIVIL EMPLOYMENT.  
(Excluding Rural Workers and Domestic Workers in Private Homes)

(a) Revised since last issue.

B. INDUSTRIAL GROUPS.

Total employment in January 1944 was 2.2 per cent less than in November 1941. Amongst the industrial groups, however, munitions, aircraft and shipbuilding were 61.2 per cent above the November 1941 level - the increase in numbers of employees being 43,400 since November 1941. Rail and air transport in January 1944 had 10,700 more employees than in November 1941 and in Governmental n.e.i. there were employed 52,500 more than in November 1941. All other industrial groups except shipping and stevedoring and other transport and communication employed fewer workers in January 1944 than in November 1941.

Males: Changes in the various industrial groups which have occurred since November 1941 may be described as follows: Increases - Governmental n.e.i., munitions, aircraft and shipbuilding, rail and air transport; Practically unchanged - shipping and stevedoring; Decreases - building and construction, banks and insurance, retail trade, wholesale trade, etc., mining and quarrying, other transport and communication, forestry, etc., and "Other Industries" (which includes professional, health, education and other "Service" industries).

Females: Since November 1941 the greatest increases in the numbers of females employed have been in munitions, Governmental n.e.i., rail and air transport, other transport and communication and banks and insurance. There has also been an increase of female employment in "Other Industries". Females employed in other factories and workshops and in wholesale trade are approximately the same as in November 1941. Employment of females in retail trade in January 1944 was 10.4 per cent below November 1941.

During January 1944 there were decreases in the total numbers employed in munitions, aircraft and shipbuilding, building and construction and Retail trade. In the last-named industry, the downward movement followed the seasonal peak of December. Industries which showed increases in employment included Other Factories and Works, Government n.e.i., and "Other Industries", while Shipping, Wholesale trade, Banks and insurance and Rail and air transport showed small increases.

Males employed in the above-mentioned industries showed similar movements to total persons and likewise females except in respect of Other Factories and Works and Wholesale Trade (decreases).

Masculinity of Employees: The tendency to replace males with females is illustrated by the following figures for masculinity of employees (males per 100 females) in July 1941, November 1941 and January 1944 respectively:- Munitions, aircraft and shipbuilding - 591, 533, 52; other factories - 249, 245, 235; retail trade - 100, 96, 74; transport and communication - 962, 940, 569; banks and insurance - 247, 228, 108; wholesale trade, etc. - 273, 257, 207; Governmental n.e.i. - 214, 203, 165; other industries (professional, education, health & personal service except private domestic) - 86, 85, 67.

The following statement shows the estimated numbers in employment in the main industrial groups:-

AUSTRALIA : WAGE AND SALARY EARNERS IN CIVIL EMPLOYMENT : INDUSTRIAL GROUPS.  
(Excluding Rural Workers and Domestic Workers in Private Homes)

Industrial Group	Novem- ber 1941	January 1943	June 1943	Decem- ber (d) 1943	Jan- uary 1944	Proportion at change on Nov. 41

(a) Includes Government establishments, annexes and certain private firms engaged on munitions, aircraft and shipbuilding, but excludes most private factories engaged on war contracts; (b) includes employees on Allied Works Council projects; (c) includes Education, Health, Professional, Hotels, etc.; and for females, Mining, Building, Forestry, etc. which are shown separately for males and persons; (d) revised since last issue.

C. STATES : TOTAL EMPLOYMENT.

The table on the following page gives a comparison of estimated civil employment by States.

In most States total employment (excluding rural and private domestic)

reached a peak in December Quarter 1941. In South Australia the peak was not reached until April 1942. In Queensland and Tasmania, civil employment reached a temporary peak at about the same time as the other States. After declining, civil employment in these States increased so that in January 1944 estimated civil employment in Queensland was 16,800 above the November 1941 level and in Tasmania, the corresponding change was 300.

Males: Only in Queensland has the peak of non-rural male employment (which was reached in December Quarter 1941) since been exceeded. In general, there has been little change in non-rural male employment since the middle of 1943.

Females: Total employment of females usually shows some seasonal recession in January owing to temporary decline in retail trade and certain classes of factory employment.

STATES : WAGE AND SALARY EARNERS IN CIVIL EMPLOYMENT.  
(Excluding Rural Workers and Domestic Workers in Private Homes)

State	November 1941	January 1943	June 1943	December 1943	January 1944	Increase % November 1941 to Jan. 1944.

(a) Revised since last issue.

D. STATES : INDUSTRIAL GROUPS.

During January 1944 male employment increased in New South Wales, Victoria and Queensland, and in South Australia there was no change while there was a small decrease in Tasmania and a larger decrease in Western Australia. The decrease in Western Australia was due largely to seasonal factors. Male employment declined in munitions, etc. in all States except South Australia and Western Australia; in building in all States except South Australia; and in retail trade in all States except Tasmania. Male employment expanded in Other Factories and Workshops except in South Australia; in Shipping and Governmental n.e.i. except in Western Australia and Tasmania; and in rail and air transport except in Victoria, Western Australia and Tasmania.

During January 1944 female employment in retail trade decreased seasonally in all States except Tasmania. There was a general decrease in female employment in munitions, etc. except in Western Australia and in Other Factories and Works except in Queensland and West Aust. Female employment in banks and insurance and in Governmental n.e.i. increased in all States. In Other Industries there were increases except in Tasmania and Western Australia but in those States there was scarcely any change.

In the following table estimated employment in each industrial group in each State is shown for the month of January 1944:-

STATES : WAGE & SALARY EARNERS IN CIVIL EMPLOYMENT : INDUSTRIAL GROUPS.  
 (Excluding Rural Workers and Domestic Workers in Private Homes)

Industrial Group	January 1944

See Notes (a), (b) and (c) to the table on page 3 .

The foregoing statistics relate to total employment and are based on statistical data obtained from various sources including Pay-Roll Tax returns, and direct returns of Commonwealth Government employment.

### PART III.

#### PAY-ROLL TAX

The collected figures for Pay-Roll returns for Australia are given without any adjustment in the next table. (Similar tables are available for each State and will be supplied on request to any person requiring them.) The returns do not cover employees of the Commonwealth Government; employers who pay not more than £20 per week in wages do not make returns and religious and public benevolent institutions and hospitals are also exempt. The proportion of all employees who are included varies from State to State, but in general the proportion of employees (other than those of the Commonwealth, and those engaged in rural industries, and female domestics in private households) in the Pay-Roll Tax returns is about 90 per cent of the estimated total of males in employment, and about 80 per cent of the females.

Employers were classified for "industry" according to the industry in which they were predominantly engaged. The following table may be taken as indicating trends from month to month, but not as a guide to the absolute numbers employed in the respective industries.

## PAY-ROLL TAX STATISTICS - AUSTRALIA

Number of employees stated to be on last pay-roll in the month  
of all employers making Pay-Roll Tax Returns(a).
